

**現代経済の課題AIV (Contemporary  
Economic Issues AIV)**

Syllabus Number      ECP-338  
Elective      2 credit  
NAKAGAKI, Keiichi

1. Course Description

Global demand for infrastructure is enormous with rapid urbanization and economic growth of emerging countries specially in Asia. Following the sector analysis made at previous semester, this course will focus on the challenge of infrastructure development in ASEAN countries through studies on activities/challenge of Japanese companies and Japanese Government's policy. The aim of this course is to assist students to understand Japanese view/policy so that they can make their own analysis on the challenge of infrastructure development of their country.
