

ECCP(Logical Thinking) III

Syllabus Number

SEM-303

Elective

2 credit

NISHIDA, Ryoichi

1. Course Description

This course, in spring semester, aims to develop logical thinking by studying and discussing current issues.

Approaches taken in the course include: taking up one national or international topic at a time; analyzing it from various angles (what happens, why it happens, what is the point of the matter, etc.); forming and expressing opinions on the issue; reading and transcribing related editorials; writing short essays on the issue.

Emphasis is also on improving writing and communication skills.
