HAMADA, Yo

## 1. Course Description

Through a cultural analysis of the various religions of human beings, we will examine the theme of "death and rebirth" and "life and death" in more detail, traversing the levels of people, culture and civilization.

How have human beings perceived religion? And how do we catch it? In this lecture, in addition to traditional religious culture, we will combine humanism, which places the highest value on the value of human beings, and new trends, which place the highest priority on new technologies, and include them in the broad sense of "religion" before proceeding.
