1. Course Description

This course is twice a week which combines Conversation IV and Conversation II.

This class will continue with the previous term, focusing on conversation. We will train students to be able to express simple conversation exchange and simple short sentences. We will do technical training as a part of the lesson to understand the meaning of the conversation sentence and memorize it. While practicing vocabulary usage training in conjunction with the listening lesson, we will increase regular vocabulary and train simple events to others. In accordance with the progression of the class focusing on the grammar of the first year students, we will practice conversation by scenes in this class.

Along the content of the teaching material, we also master expressions that Chinese people usually use frequently. In conjunction with the class content of Chinese conversation II, we will conduct repeated classes on "speaking", "writing" and "reading" that balanced listening and conversation.
