

Japanese Cultural Research (History of Everyday Life) I

Syllabus Number

CUA-201

Elective

2 credit

SUZUKI, Toshihiro

1. Course Description

I lecture on Japanese culture at this session. Japanese culture consists of various elements. There is something various to something concerned with a life including a painting and a sculpture as a component. I'll think about Japanese culture with our daily life as a material in particular in this lecture. The time makes* antiquity and the Middle Ages the subject primitively. I lecture on public opinion in each time and living culture.
