

Advanced Laboratory Course in Psychology 2

Syllabus Number

SEM-302

Compulsory 2
credit

MOCHIZUKI, Kaname

1. Course Description

This is a undergraduate seminar with reading and discussion about the empirical articles on the Experimental Analysis of Behavior (EAB). The goal of this course is to think about the historical and current issues in EAB. Each student will be required to work in teams on class presentation, attendance in class and active participation.
