1. Course Description

Study of Class in Education for Children with Physical Disabilities

The aim of this class is to develop practical abilities to educate children with physical disabilities as well as multiple disabilities.

In this lecture, students are required to visit a class at special schools and report it and have presentations and discussions about the record of the observation of children with physical disabilities and with multiple disabilities.

Students will deeply understand educational methods to grasp surely the actual situation of each child and make an individual educational plan according to educational needs for each child.

Furthermore, students will study methods to improve a class of the subject and Jiritsu katsudou (self-reliance activities).
