

文化と経済Ⅰ

Syllabus Number

ECO-101

Compulsory Elective
2 credit

SUGIURA, Fumikazu

1. Course Description

Without knowing the culture of the economies, we can somehow understand the economy of one country or region. However, in order to have a deeper understanding of the economy, we should know the cultural backgrounds. We regard cultural backgrounds as a wider concept of the culture. History, language, custom, or social value system may affect the functioning of the business activities in a country. As a preparatory stage of the introduction of the international economy, we will have a fun and useful lecture made by various lecturers who have a profound knowledge of the economy and culture of a certain country.
