

Social Problems

Syllabus Number SOC-324
Elective 2 credit
YAMAGUCHI, Takashi

1. Course Description

“Social problems” is a broad term used to describe a range of problems. In this course, the views of sociology regarding social problems will be described, followed by the nature of social problems and their implications. What emerges from this is a question related to the public nature of society: how do people with diverse opinions live together? This question can help us to deepen our understanding of the connection between “social” problems and our everyday life.
