1. Course Description

It has long been said that "the 21st century is the Asian era". Actually, the development of Asia has been impressive and it is important for Japanese companies to use management resources become in the Asian market. Under the situation, we need to know the Asia. However, the Asia region consists of various countries with political system, economy, society and culture and is changing very active. In this seminar, we will study the development process of the Asian economy and economic relations between Japan and Asia from the viewpoint of development economics.
