## 1. Course Description

The main purpose of this course, aimed at students who have already learnt the basic structures of French, is to make it possible for them to talk more accurately about different daily situations. While learning proper grammar is also important, a special focus will be made on oral communication, i.e. listening to someone, understanding what (s)he is saying, then speaking / reacting. At the same time, the course will also deal with cultural aspects of France and other French speaking countries around the world. This course will be only in French.
