

Training on Social Business

Syllabus Number

SWS-202

Elective

2 credit

LEE, Youngsook

1. Course Description

This course aims to bring students into a close relationship with the local community by cooperating with social enterprises or NPOs. This course is intended for the students who have already taken the "Basic Training on Social Business" course. During the summer, students will practice at a social enterprise/NPO. Based on these experiences, students will make a presentation to send to the community or other students. This course guides students in preparing for the presentation and planning of an event.
