

Research Methods in Educational Psychology II

Syllabus Number

EDP-105

Elective

2 credit

TAKIGIKU, Kazuyoshi

1. Course Description

Starting with the basics we will learn about the methods of statistical analysis of data collected from Educational Psychology research. First we will study the principle techniques of analysis, then we will learn how to put those techniques into practice. The aim is for you to get a firm grasp of the basics of statistical analysis, and for you to get a clear understanding of each analytical procedure and its significance.
