

Introduction to Macroeconomics I

Syllabus Number

ECT-103

Elective

2 credit

HORIUCHI, Eiji

1. Course Description

This course provides an introduction to macroeconomics. First part of the course provides how to measure a nation's income, and how to measure the cost of living. Then we study the real economy in the long run, where we focus on the determinants of the key real variable, for example, growth in GDP, saving and investment, real interest rates, and unemployment.
