

Seminar : Education I

Syllabus Number

SEM-301

Compulsory 2
credit

AKAISHI, Tamotsu

1. Course Description

I imagine "the figure of the child who finds a problem by oneself because I get close naturally, and works on a solution to the problem" and, facing the teaching materials, want to do a study to create instruction scenes concretely. I understand contents of the science instruction well and I examine development and the instruction method of the teaching materials along a study theme of each person and study it. And I aim at settling a state of the science instruction for oneself.
