

Fire Prevention Administration II

Law and

Syllabus Number

LAW-202

Elective

2 credit

KOBORI,Yuriko

1. Course Description

The work of firefighting institutions has four elements : firefighting,rescue,emergency first-aid and fire prevention.

The objectives of fire prevention administration which is one of these are preventing the occurrence of fires in buildings and minimizing damages.

The purpose of this course is to understand the legal grounds and procedures for the fire prevention administration : fire inspections,fire prevention management and orders to issue for violations of the Fire Service Act.

This course is also very useful for those who take the examination for Qualified prevention engineer.
