

Macroeconomics II

Syllabus Number

ECT-204

Compulsory Elective
2 credit

SUZUKI, Taku

1. Course Description

In this course, I will explain intermediate macroeconomic theory to those who have taken Macroeconomics I in the spring semester. Although I will attempt to explain the theories without using a difficult mathematical model, students will be required to concentrate and think logically, because amount of writings on the blackboard will be enormous. In addition, students will need to pursue the fundamental principles of people's behavior which underlie economic theories.
