

Indian Economy II

Syllabus Number

ECP-322

Elective

2 credit

ISHIKAWA, Masashi

1. Course Description

India is further reviewed from various aspects in this course, following spring semester. Some major industries like automotive, IT services and pharmacy are studied to foresee expected future growth. Also function and structure of Zaibatsu is explained as powerful engine for the growth in these industries. In addition to these economic issues, historical relationship between India and Japan, especially in India's fight for independence in the 20th century will be also studied to understand India more comprehensively.
