1. Course Description

The goal of this class is to provide an overview of what qualitative research is, as well as an overview of the different types of research techniques. In particular, we will learn about interviewing and observation methods, and consider what can be achieved by using these methods among qualitative research methods. In this half-year course, students will experience data acquisition planning, data analysis, and research reporting, and acquire practical knowledge that will be useful in their activities after graduation. The maximum number of participants is 20, and if the number exceeds the limit, a lottery will be held.
