1. Course Description

When one faces the criminal accusation, gets declared as a ward of the court, or fight over the custody of children, the person is in a real crisis. Psychology helps the judiciary and the people handle those situations. While this class aims at the preparation for the exam for professional psychologists, students would see how the clinical mind of psychology serves in judicial fields and, possibly, in their own future cases, as those matters often lurk behind the overt main complaints.
