

English for Civil Service Examination I	Syllabus Number	CAE-217
	Elective	2 credit
YOSHIDA, Koji		

1. Course Description

This course is designed (mainly) for juniors who want to become civil servants. There is a unique format for English questions on the civil service exam, and you need to get used to that format first. In addition, you must develop speed-reading skills because the time you can allocate to the English reading comprehension part of the exam is rather short. Using a collection of past questions, we will train you so that you can answer "basic level" questions with certainty.
