

Seminar II

Syllabus Number

SEM-302

Compulsory 2
credit

TOMITA, Hideaki

1. Course Description

This course aims to follow the trails of economic growth in post-war Japan from the viewpoint of innovation, and to study the role of innovation in future economic growth in Japan. Autumn course aims to learn development trend of artificial intelligence, and to study AI's impacts on Japanese economy, business world, and specific industries that seminar students take a deep interest in. If possible, the degree of contribution to Japan's economic growth by AI would be examined.
