

# Statistics for Psychology I

Syllabus Number

STS-101

Compulsory 2  
credit

IIJIMA, Yuudai

## 1. Course Description

For quantitative studies in psychology, statistical analysis is essential to investigating psychological phenomena. Thus, the knowledge of statistical analysis is needed to adequately understand literatures in psychology, to conduct research, and to write a report or graduation thesis. In the first semester, I lecture the basic knowledge of statistics and statistical technique used in psychology.
