Compulsory 2
credit

NARIYA, Atsushi

1. Course Description

The way of the education in the knowledge base society does not answer the purpose only in (I let you do it) learning merely knowledge and a skill. "The learning" that continues metamorphosing the meaning to self and a learning object has been demanded. It is similar in the subject physical education, and, in the relations with self and others and the thing, it is pursued in the meaning of the exercise that I wear a skill and knowledge, a thing such as the social nature in a setup, the process that continue metamorphosing it. Based on outlook on such learning, I deepen the way of the making of physical education class through the talks of participant aspect each other based on the reading by turns of documents.
