

Traditional Culture (Folklore) I

Syllabus Number

CUA-203

Elective

2 credit

TAKAHISA, Mai

1. Course Description

In this class, you will learn the origins of the study of traditions in Japan, the spread of various traditional culture materials, and research methods. The study of traditions is the study of investigating and analyzing the phenomena that we perform as acts, possess as knowledge, and retain as ideas in our lives. You will understand the basic knowledge of the study of traditions so that you can collect traditional culture materials by yourself, not just academic history and methodology. In the spring class, lectures will focus on academic history, research methods, and an overview of traditional culture materials.
