ISHIKAWA, Motoko・MEDO, Ikue	

1. Course Description

In this lesson, we will give prior guidance and follow-up guidance for the first childcare training necessary for childcare professional qualification acquisition.

In the autumn of the second grade, we give prior guidance on nursery practice training and we will give guidance after nursery practice training at the third grade spring.

Under the preliminary guidance, understand the content of nursery care and clarify their tasks as much as possible. In the after-school guidance, we will review the practical training so that we can face the next practice with new issues.
