

Practical on Statistics and Survey Data Processing II

Syllabus Number

STS-204

Compulsory Elective
2 credit

WATANABE, Kohei

1. Course Description

The aim of this practical is to be accustomed to basics of quantitative analyses in social science. These days we can easily analyse statistical or survey data using personal computers. Starting with the use of spreadsheet software, we will advance to the use of Statistical Package for Social Science (SPSS). After learning the basics on descriptive statistics and cross-tabulation, statistical testing and correlation analyses will be conducted.
