2 credit

OHNUKI, Masumi

## 1. Course Description

The drawing and crafts class is positioned with the following goals in the elementary school curriculum. Through activities of expression and appreciation, we aim to develop the qualities and abilities that are richly related to the shapes and colors of our lives and society by exercising our perspectives and ways of thinking.

(1) To be able to creatively create and express by using materials and tools and devising ways of expressing, while understanding through one's senses and actions the modeling perspective that captures objects and events. do.

(2) To be able to think about the goodness and beauty of modeling, what you want to express, how to express it, creatively think and conceive, and deepen your own perspective and feeling about the work.

..

(3) Enjoy the joy of creating, cultivate sensibilities, cultivate an attitude of trying to create a fun and prosperous life, and cultivate rich emotions.

("Explanation of Elementary School Curriculum Guidelines, Drawing and Crafting", Ministry of Education, Culture, Sports, Science and Technology, 2017)

In this lesson, in line with the three pillars of qualities and abilities cultivated through the Department of Drawing and Crafting, while actually experiencing the "subjects" that are the core of the lesson structure, the goals, contents, methods, teachers, etc. are related. Deepen understanding of subject guidance.
