1. Course Description

This lecture aims to gain a better understanding of the European economy as the EU (European Union) has evolved and expanded, focusing on the EU and examining its consequences and the issues facing it. The current EU is facing an unprecedented situation, with UK withdraws from EU following the Greek and Euro crises since the 2008 global financial crisis. We will consider the roots of the problem based on the historical background and mechanism of the EU. I hope that class attendees will increase their interest in Europe and welcome any questions or comments.
