

## 発達評価法Ⅱ

Syllabus Number

DEP-204

Elective

2 credit

KONDO, Kiyomi

### 1. Course Description

In this lecture, the assessment methods from the view point of developmental psychology will be discussed with the five cases in which the protagonists have some psychological problem in each life stage. As developmental assessment, we have to learn not only psychological test but also observation methods of behaviors in multiple contexts and interview skills to gather information about the subject. We also have to learn how to integrate the information and establish intervention plan based on it.
