ECS-202

Compulsory Elective
2 credit

BABA, Shinya

1. Course Description

Statistics has a very wide range of applications, not only in academic research but also in business. With the large amount of data generated in recent years, the use of data in business has become increasingly important. In order to utilize data, it is important to study statistics. In this lecture, the basics of statistics will be explained. In Statistics II, statistical inference and statistical hypothesis testing will be taught.
