2

credit

KANO, Rui

1. Course Description

In this class, in order to deepen the knowledge of life science, we will acquire knowledge about hematology, physiology, and infectious diseases, mainly in the fields of medicine and microbiology. In addition, for the sake of interest, we will explain the diseases related to each organ by taking animal diseases and treatments as examples. As a practical study, I aim to acquire knowledge that interests me in employment in medical / drug discovery and bioscience-related companies after graduation.
