1. Course Description

The topic of this course is "The European Union: History, Present and Perspectives". The EU is a very important international organization, but it is facing a crisis. The largest part of Europe had been destroyed during the Second World War, but the EU developed so well after the conflict that its building process became a model for most of the regional organizations in the world. After having introduced the main steps of the EU's history, we will try to think about the various issues that it will have to face in the future. Among the 15 classes given, 14 will be given on the campus and 1 (the 13th) will be given on demand, through the LMS of the university.
