

**現代経済の課題AⅣ (Contemporary
Economic Issues AⅣ)**

Syllabus Number ECP-338
Elective 2 credit
NAKAGAKI, Keiichi

1. Course Description

Global demand for infrastructure is enormous with rapid urbanization and economic growth of emerging countries specially in Asia.

The course will focus on the challenge of infrastructure development in ASEAN countries through studies on activities/challenges of Japanese companies as well as Japanese Government's assistance policy.

The goal of the course is that students understand Japanese view/policy and can explain their own analysis on the challenge of infrastructure development of their own county in the report/presentation at the end of semester.
