Seminar II

TOMITA, Hideaki

1. Course Description

The purpose of this course is to learn the growth trajectory of the Japanese economy from the perspective of innovation, and to think about the future of the Japanese economy. In the second half, we will read the trends of AI, which has been attracting attention in recent years, in a textbook, and then examine the contribution of AI to the growth of the Japanese economy. At that time, we will pick up the industries and occupations that the seminar students are interested in and discuss the impact of AI on the future of the industries and occupations through group work.
