

Seminar I

Syllabus Number

SEM-301

Compulsory 2
credit

BABA, Shinya

1. Course Description

Nowadays, there are more opportunities to use data, but analyzing data does not necessarily mean that it will create economic value. It is important to use the results of data analysis for decision making. In this course, you will learn how to analyze data while using a computer, and how to utilize the results of the analysis for decision making.

In Seminar I, students will learn how to analyze data using computers, basic frameworks for problem solving, and presentations using PowerPoint through exercises using sample data.
