1. Course Description

Calligraphy is the art of using letters to express one's feelings and emotions in a visible and palpable form. Today, calligraphy has taken on a new dimension as a cultural art form, not only as a traditional culture, but also as a field that has expanded its activities into the field of design. In this class, students will learn the rudiments of calligraphy as an art form by developing their own image of what they want to write and how to express that image.
