## 1. Course Description

While experiencing the joy of expression with the brush, students will learn how to write "hiragana" correctly, neatly, legibly, and beautifully. The study of the brush is to learn the original way of writing letters by the brush and to deepen one's understanding of writing characters. This class is not about writing letters well with a brush, but about acquiring the skills to write hiragana "correctly, legibly, and beautifully" with the hard pen that is used daily.
