

Korean Culture II

Syllabus Number

LIG-102

Elective

2 credit

Eunjeong Baek

1. Course Description

The goal of this class is to deepen the understanding of the Korean Peninsula, especially South Korea. South Korea is the closest country to Japan in terms of distance. Therefore, it has various relationships from ancient times to the present. By learning about Korean society and culture from various perspectives, we will deepen our understanding of Korean society. The former ancestors have a history of "exchange" and a history of "war". Through this class, we would like to think about what kind of Japan-Korea relations we should build in the present age.
