1. Course Description

The lecture is a lecture format that uses both textbooks and PowerPoint, and explains the overall picture of the fire prevention administration system by such firefighting organizations from the viewpoint of firefighting laws and regulations.

In addition to introducing the firefighting administration, we will explain how firefighting laws and regulations are operated in administrative practice, and from the perspective of the practical science intended by the Faculty, the perspective of the firefighters who execute the administration and the general position to receive it. The lecture will be conscious of both the viewpoint of the citizens.
