

Fire Prevention Administration III

Law and

Syllabus Number

LAW-203

Elective

2 credit

SAITO, Kazufumi

1. Course Description

This lecture introduces students to the relations between the standard of dangerous materials and facilities. The dangerous materials are essential for our life. Safety measures are also vital for facilities to store those materials. Each class focuses on the importance of the dangerous materials regulation based on the examples, such as the chemical factories and the fuel supply handling places.
