1. Course Description

The purpose of this course is to learn the basics of macroeconomics, which targets events related to the economy of a country as a whole, while considering the roles played by each economic agent. In the second half, after clarifying that the views on the role of economic policy differ depending on differences in economic thinking, we will focus on the problems and policies that Japan should solve. Finally, we aim to master the main theories that determine economic growth and foreign transactions.
