

ECCP (Logical Thinking) II

Syllabus Number

SEM-204

Elective

2 credit

OKAMOTO, Michiro

1. Course Description

This autumn course aims to further develop logical thinking by studying and discussing current issues. Teaching methods include: taking up one national or international topic at a time; reading related stories in Japanese; grasping the gist of them and analyzing them (what happens, why it happens, what issue is at stake, etc). While emphasis still is on improving reading comprehension, written and oral presentation is introduced in autumn.
