

Seminar I

Syllabus Number

SEM-301

Compulsory 2
credit

WAKAYAMA, Noboru

1. Course Description

The course aims to acquire the critical thinking skill, such as to think things right, but not to think right things. Students in university should do thinking right, though students in high school can do the right thinking only(*1). The course covers contents as follows, Deduction, Induction, Logic Trap, Classification, MECE, Logic Tree, Framework Approach, Problem Finding, and Problem Solving.
