

Economy of Tama Region II

Syllabus Number ECP-212
Elective 2 credit
TOKUMASU, Hidehiro

1. Course Description

The development of the industry in the Tama area is caused by utilization of university technology seeds, financial institutions and corporate support organizations. Through these, the region creates many new industries through industry-academia collaboration and inter-company collaboration, and leads the manufacturing of Japan.

In the lecture, I will learn the current state of industrial development and industrial activities in the Tama area.
