

心理学研究法Ⅳ(観察法)

Syllabus Number

PSY-206

Compulsory Elective
2 credit

KUSAYAMA, Taichi

1. Course Description

Observation (watching what people do) would seem to be an a fundamental method of carrying out research in psychology. The purpose of this observation method is to learn the basics of the observation method by deciding the theme practically and observing the behavior. Each student will be required to work on these different types of observation, participate in constructive discussion, and submit brief reports.
