Seminar I

YAMAYA, Kazuki

1. Course Description

The objective of this seminar is to enable students to process and analyze accounting data. Specifically, this seminar aim to learn the theory of accounting information systems and the handling various digital accounting applications. In Seminar I, this course will mainly focus on "analysis of accounting data", where students learn how to analyze accounting data statistically through practical training in Excel and Business Intelligence (BI) systems. In Seminar II, this course will mainly focus on "processing of accounting data", where students learn how to process accounting data efficiently and effectively through practical training in Excel, Cloud accounting and Robotic Process Automation (RPA).
