

Introduction to Macroeconomics II

Syllabus Number

ECT-104

Compulsory Elective
2 credit

TANAKA, Kenji

1. Course Description

This course covers the theory of introductory macroeconomics. We will focus on the measurement and determination of macroeconomic variables—such as GDP, employment, inflation, and interest rates. We will apply the frameworks to discuss examples of macroeconomic phenomena. We will also understand the effect and limitations of macroeconomic policy in stabilizing the business cycle and promoting growth.
