データサイエンス特定課題演習

Compulsory　4 credit

ONO, Takashi

1. Course Description

The purpose of this class is to deepen the understanding of organizations and networks by using familiar data such as one's workplace while making use of the knowledge learned in "Management Organization and Networks". Specifically, we start by collecting and analyzing data about personal networks within the organization found in familiar relationships in our workplace. Therefore, it is desirable to be able to use spreadsheet software such as Excel when taking this class.
