

現代経済の課題AIII (Contemporary Economic Issues AIII)

科目ナンバリング ECP-337
選択 2単位

中垣 啓一

1. 授業の概要(ねらい)

Global demand for infrastructure is enormous with rapid urbanization and economic growth of emerging countries. Japanese companies are capitalizing these opportunities and the Japanese Government's strategy is to support Japanese companies in export of infrastructure system as an important growth strategy.

Through the course, analysis on overseas development of the infrastructure system is made based on my infrastructure business work experience in the trading company and the engineering company.

The course is designed to assist students to understand the important business fields of infrastructure system export and the strength and challenge of Japanese companies active in those fields by making comparison with activities of competitors' countries.

The goal is to help students to make use of the knowledge gained through these analysis for their future career formation.

2. 授業の到達目標

The objective of the course is to let students understand strength and the challenge of the Japanese companies in at least in two or three business fields of infrastructure system export .

3. 成績評価の方法および基準

On or two written assignments related to the above objective (100%). Details will be explained at the Introduction.

4. 教科書・参考文献

教科書
